Who We Are

Company overview and strategic capabilities

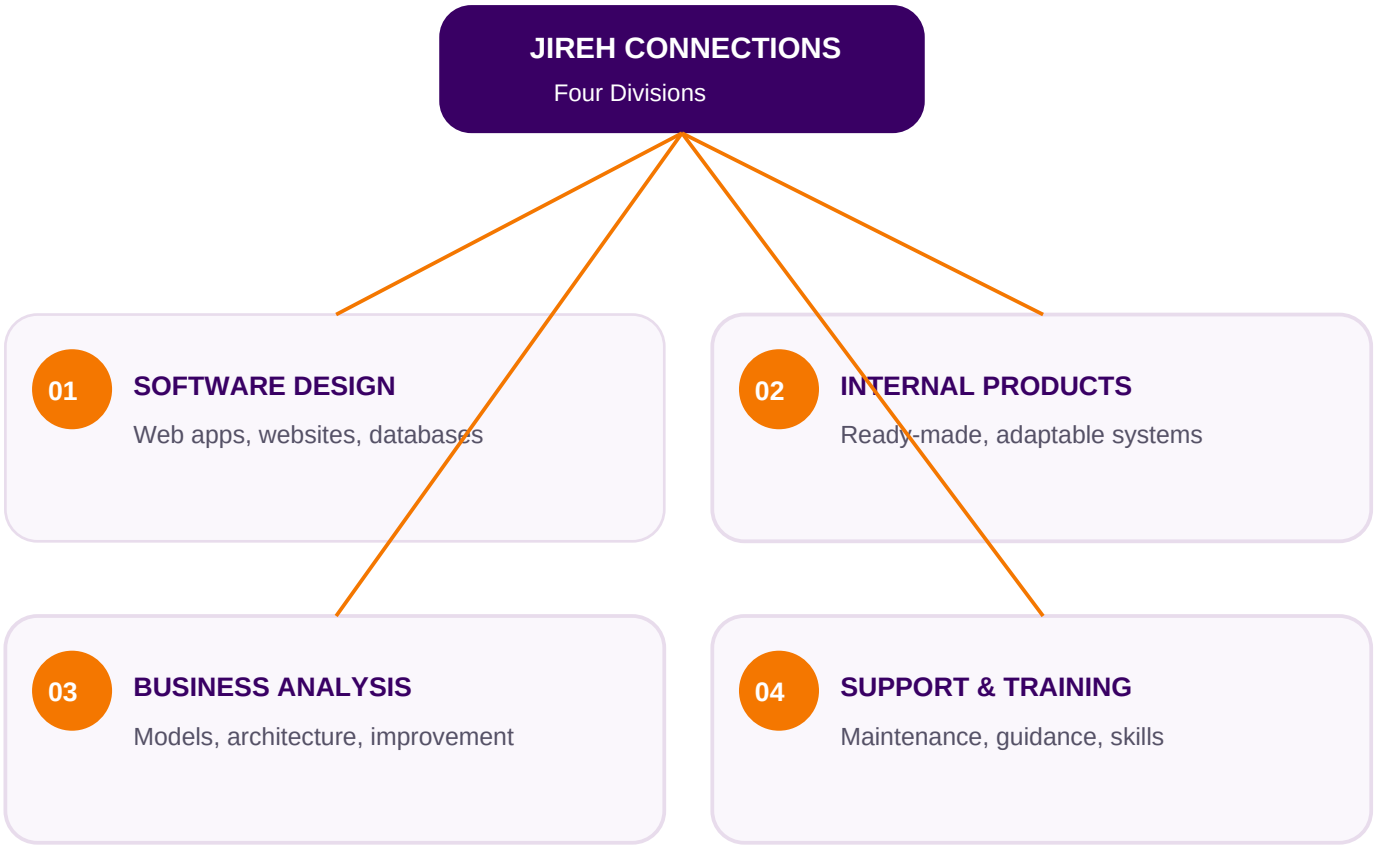

About Jireh Connections

Jireh Connections is a vision-driven, project-oriented technology and business solutions provider committed to professionalism, innovation and measurable client value. We help organisations modernise traditional processes, improve operational efficiency and make informed decisions through tailored digital solutions.

Our Approach

We combine business understanding with practical technology to design scalable solutions that support data capturing, workflow automation, reporting, collaboration and service delivery. Our offerings range from ready-made business applications to customised software and advisory services.

Our Four Specialised Divisions

Our Services

Digital transformation and business improvement

Custom Software & Web Applications

Tailored applications for data capturing, document management, automated calculations, unique reference numbers, operational workflows and business reporting. Solutions can support computer and tablet access for flexible working.

Database Management & Data Analytics

Secure digital recordkeeping, structured data processing, dashboards and timely reports that help organisations monitor performance and make evidence-based decisions. Access controls and backup options can help reduce data-loss risks.

Microsoft SharePoint Solutions

Configuration and customisation of document libraries, team collaboration spaces, permissions, version control and workflow automation to strengthen information management.

WhatsApp Business API Solutions

Business messaging integrations supporting automated responses, chatbots, multi-agent customer service and ticket-based enquiry management, subject to platform capabilities and configuration.

Business Analysis & Process Improvement

Business model assessment, requirements analysis, process mapping, workflow optimisation and business architecture guidance to align people, processes and technology.

Maintenance, Support & Training

Application maintenance, troubleshooting, user assistance and practical training in software systems, Microsoft SharePoint and general digital tools.

Business Software Products

Ready-made solutions customisable to operational needs

BUMER Web App | Business Manager

Business management platform for quotations, invoicing, inventory, customer statements, projects, employee-related administration and operational reporting.

MyFiles Plus | Law Firm Edition

Matter and file administration, daily activities, court-date reminders, notes, attachments and invoicing for legal practices.

MyFiles Plus | Farm Edition

Digital farm records, operational activities, production capturing, reports and invoicing for agricultural businesses.

THA Transport System

Transport administration covering operational documentation, incidents, maintenance expenditure, log sheets and periodic reporting.

Fleet Management | Trucks & Scooters

Customisable fleet records, vehicle servicing, expense histories, driver management, load information and proof-of-delivery records. Scooter-focused options support rental payments and individual asset expenses.
